Profile Summary

Motivated Software Engineer with hands-on project experience in Java, Python, JavaScript and full-stack web technologies. Completed an industry-focused internship in Web Development through Unified Mentor, building practical, real-world applications. Strong foundation in front-end and back-end development, databases, and object-oriented programming, seeking to contribute to a growth-oriented software development role.

Professional Experience

Web Development Intern

Unified Mentor

Industry-focused Internship Program

Nov 2024 – Jan 2025

- Completed a hands-on internship in Web Development through **Unified Mentor**, an EdTech and career-upskilling platform providing industry-focused internships, practical project experience, mentorship, and certifications to students and fresh graduates.
- Designed and developed web-based applications using HTML, CSS, JavaScript, and Python under mentor guidance, gaining exposure to real-world project workflows.
- Strengthened front-end development, debugging, and problem-solving skills; successfully completed the program with a certification in Web Development.

Skills

- Programming Languages:** Java, Python, JavaScript, SQL
- Backend:** Node.js, MongoDB
- Web Technologies:** HTML5, CSS3, JavaScript, React, Angular (Basics)
- Databases:** MySQL
- Tools/Platforms:** Git, GitHub, VS Code
- Soft Skills:** Good Verbal Ability, Problem Solving, Team Collaboration, Adaptability, Time Management, Multi-Tasking

Education

Bachelor of Technology (IoT)

2021 – 2025

Swami Vivekananda Institute of Technology, Secunderabad

CGPA: 7.29

Projects

Train Reservation System

Java, MySQL

- Developed a console-based Java application for train ticket booking and cancellation, integrated with MySQL for data persistence of trains, passengers, and bookings.
- Implemented core features like booking status, PNR generation, and seat availability.

Product Recommendation System

Python, Machine Learning

- Developed a machine learning-based recommendation engine using the Apriori algorithm, enhancing customer engagement by 20% through personalized recommendations.
- Implemented efficient association rule mining, ensuring scalability for large datasets.

Full-Stack Web Application

React, Node.js, HTML & CSS

- Built a full-stack web application with a React front end and a Node.js/Express back end, implementing RESTful APIs for dynamic data handling.
- Designed responsive, component-based UI using React and HTML/CSS, ensuring smooth navigation and cross-device compatibility.
- Integrated front-end and back-end services for real-time data updates and efficient client-server communication.

Certifications

- Certified Java – One Road Map
- SQL (Basic) – IBM Skills Network
- Python Workshop – SVIT
- Job Simulation – Deloitte (Forage)
